8. Soils	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Revegetation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Purpose of Inspection:**

This inspection was done while in the area.

**Inspection Summary:**

1. The operator expressed concerns that the existing quarry is nearly finished and wants to start development of a new quarry. I discussed the amendment process with him. He also showed me where he was considering to locate the new quarry. I stressed the importance of having the amendment approved prior to developing the new quarry.
- 5 & 7. It was noted that a new road had been constructed around the northeast portion of his permit. It appeared that a portion of this road had been reclaimed. In questioning the operator about the status of this road, he indicated that it had been constructed by someone else, and that the land owner had requested that this road be reclaimed. (This was confirmed by the other operator).

**Conclusions and Recommendations:**

The operator will submit an amendment in the near future for the proposed new quarry area.
